PROFESSIONAL SUMMARY

Final-year AIML student with strong expertise in Java, DSA, and AI-Assisted Development, currently pursuing a Bachelor's degree in AIML. Proven ability to lead projects and collaborate effectively within teams, with hands-on experience in developing innovative applications. Committed to leveraging technical skills to create user-centric software solutions. Strong ability to learn quickly and adapt to new technologies.

PROJECTS

PROJECT 1: Web Application: Animal Healthcare & Medicine Delivery (Team Startup)

Concepts Used: MySQL, HTML, CSS, JavaScript, NLP(Rule-based Chatbot).
🔹 Developed a full-stack veterinary web application to provide online treatment and medicine contact services for animals. Implemented user-friendly interfaces using HTML, CSS, and JavaScript, while leveraging MySQL for Database management, contacting doctors, and secure user authentication. Integrated doctor and pharmacy listings to streamline access to veterinary services, enhancing convenience for pet owners and animal caretakers.

PROJECT 2: AI-Based Veterinary bot (Offline LLM Integration)

- **Concepts Used**: (Python, Ollama (LLaMA 3 model), REST API (localhost), Prompt Engineering

🔹 Developed a Python-based chatbot that provides veterinary advice using a locally hosted LLM. Integrated prompt engineering to simulate a veterinary expert and deliver context-aware responses without external APIs.

PROJECT 3: Chat Bot Treatment

Concepts Used: (JAVA Collections, HashMap).
🔹 ChatBot is a smart, rule-based virtual assistant developed for the MediTech (WLC) website to help users easily access animal healthcare information and services. Designed to simulate a basic conversational interface, this chatbot assists pet owners by answering common questions related to animal treatment, veterinary services, and general pet care.

PROJECT 4: Local Connect

Concepts Used: AI-Assisted Development.
🔹 Problem People waste time searching for trusted local services (plumber, electrician, tuition teacher, pet doctor, milk delivery, etc.). Current apps (UrbanClap, JustDial) are scattered, not personalized, and often unreliable. Small service providers don't have tech knowledge to reach customers. 💡 Solution A single app

SKILLS

- Programming Languages: Java(Core)
- UI/UX Designing.
- AI-Assisted Development.
- Problem Solving and Analytical Thinking.
- Public Speaking And Leadership.
- Artificial Intelligence and Machine Learning Concepts.
- Data Structures and Algorithms.

EDUCATION

- **Bachelor of Technology** (B.Tech), Branch(**AIML)**, LNCT&S, (Current **CGPA-8.02**)Expected Graduation: 2026
- **High School** MM International School, Jabalpur
  Completed Class 10th(**77%**) and 12th(**73%**)

ACHIEVEMENTS

- **3rd Winner - State Level Idea Hackathon. (Team Leader).**
- **Hackwithinfy finalist (Interview SP role).**
- **Successfully qualified** the Common Internship Test (Internship studio) **AIR-3486**.
- Participated in **Smart India Hackathon.**
- **150+ Leetcode.**
- Scored **band 7** on **IELTS speaking.**
- Member of the **Rahaat club**. (helping needy people, **Teaching sessions** in schools every Saturday and Sunday)
- Created A Team for Animal Health care(Major Project).

EXTRACURRICULAR ACTIVITIES

- Public Speaking(Anchoring , Debate).
- Sports(Swimming , Running).
- Hobbies-Dancing(top 10 in Shrishti Dance competition(2023))
