PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science (AI & ML) student with strong communication, presentation, and problem-solving skills. Experienced in leading technical projects, interacting with diverse teams, and explaining technical concepts in a simple manner. Passionate about helping professionals choose the right technology path while achieving business goals.

PROJECTS

PROJECT 1: Animal Healthcare & Medicine Delivery (Team Startup)

- Built a web platform that connects pet owners with veterinary professionals.
- Designed an easy-to-use interface to improve the customer experience.
- Worked with a team to understand user requirements and deliver practical solutions.
- Demonstrated the project to judges during a hackathon.

PROJECT 2: AI-Based Veterinary Chatbot (Offline LLM Integration)

- **Concepts Used**: (Python, Ollama (LLaMA 3 model), REST API (localhost), Prompt Engineering

🔹 Developed a Python-based chatbot that provides veterinary advice using a locally hosted LLM. Integrated prompt engineering to simulate a veterinary expert and deliver context-aware responses without external APIs.

PROJECT 4: Local Connect- Static Business Website

Concepts Used: AI-Assisted Development.

🔹 Problem People waste time searching for trusted local services (plumber, electrician, tuition teacher, pet doctor, milk delivery, etc.). Current apps (UrbanClap, JustDial) are scattered, not personalized, and often unreliable. Small service providers don't have tech knowledge to reach customers. 💡 Solution A single app
